

Eaton's Carter product line includes two versions of the Gravity Filling Adapter (GFA) for use with Closed Circuit Refueling nozzles (CCRs). Model 64014 (per MIL-N-52748) is for standard temperature applications. Model 64033 (per MIL-N-53093), is for arctic temperature use. The two units vary only in color (tan—standard, green—arctic) and the presence of a special, over-the-top, "arctic glove" capable operating handle on Model 64033.

Technical Information

- Temperatures:
-65°F to +140°F
